

AquaDT – Stand-alone version

General

This package includes of AquaDT and all supporting libraries/application. The package is in the following four folders:

- **AquaDT:** Contains the stand-alone version of AquaDT.
- **NET Framework 2.0:** Contains the .NET Framework, required by the AquaDT.
- **ASP.NET AJAX:** Contains the ASP.NET Ajax Library, required by the AquaDT.
- **Resource Editor:** Contains a custom application that makes possible the editing of resource (language) files)

Additionally, there exist three Adobe Acrobat (pdf) files in the root folder:

- **Setup.pdf:** (this file) Contains installation instructions for AquaDT.
- **Manual.pdf:** The user's manual of AquaDT.
- **Resedit.pdf:** Contains instructions on the use of resource editor.

Installation of AquaDT

In order to install the stand-alone version of AquaDT in a PC, you have to complete the following steps:

1. Install the .NET Framework 2.0, by running the "**dotnetfx.exe**" from the the "NET Framework 2.0" folder. This step is not required if the .NET Framework 2.0 has already been installed (it is part of the Windows updates).
2. Install the ASP.NET Ajax, by running the "**ASPAJAXExtSetup.msi**" from the "ASP.NET AJAX" folder. This step is not required if the ASP.NET Ajax has already been installed.
3. Copy the folder **AquaDT** into any accessible place on your hard disk.

After completing the above step, you are able to run the AqauDT. Just go to the folder created in step 3 above and run the **AquaDT.exe** executable.
